## REVISED PRICES

### JUNE 5th 1919

A large nursery recently offered us a price for our peach and plum trees growing for next fall, slightly better than we are getting by our present catalog.

The wages we pay our men are double what they were not long ago and every necessity is much higher. We are compelled to increase prices on the items listed below. On stock not so listed, the price remains the same as in catalog, for the present, but may be increased in the near future.

In making orders, these prices must be observed. They cancel catalog prices.

A. C. BALDWIN & SONS, AUSTIN, TEXAS

**STANDARD PEACH AND APPLE**

	Each	12	100	1000
2 to 3 feet, .....	\$ .35	\$ 3.75	\$28.00	\$225.00

**CUSTOMERS PLEASE NOTICE:** All prices in 1919 catalogue are still in effect, except for those varieties listed above.

We pay express in Texas on \$3.00 orders, and outside of Texas on \$10.00 orders.

We replace at half list price any stock that dies the first year. See inside front cover of catalog.

---

### BEAUTIFUL HOME GROUNDS.

See catalogue, beginning page 26. We can help you. It is desirable to have plans made for planting grounds before the shipping season starts in November.

---

### THE HAUPT BERRY.

90 quarts fruit from 16 vines. \$1,400.00 per acre.  
Read letter from Mr. Lenert:

New Braunfels, Texas, June 10, 1919.

I received sixteen Haupt Berry plants from you two years ago, and this spring from those berries we made 15½ quarts of jelly, gave two 12 quart buckets of berries to mother and aunt, sold \$5.50 worth of berries, and had all we wanted for table use . . . . .

ANDREW LENERT.

31 quarts fruit for 15½ quarts jelly, besides the jam that can be made.

24 quarts jelly given away.

35 quarts sold.

---

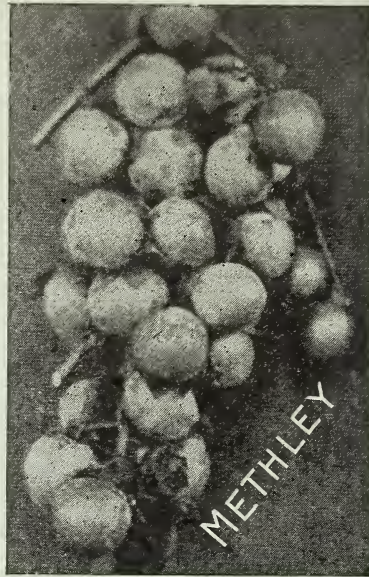

90 quarts total.

Berries for table use extra.

This is a production of 5.6 quarts per plant, or \$1,400.00 per acre of 2500 plants—valued at only 10 cents per quart.

**CALL ON US FREELY FOR ADVICE AND ASSISTANCE**

### THE METHLEY PLUM.

This plum was found in South Africa by an explorer of the United States Department of Agriculture. It has drawn forth more real enthusiastic ecstasy, more glowing praise and more immediate demand than any other of the many plums we have ever introduced.

It is a large plum, four to four and one-half inches in circumference, with greenish red skin and brilliant red flesh of a peculiar, delightful sweetness. The best flavored of all very early plums.

It is meaty with a strong thin skin that enables it to carry to any market, but it will sell at home. We predict that more trees of it will be planted than any other variety. When you taste them you want more. One man after eating freely off the trees in our test orchard went on with a handful and then went back a hundred yards to get more.

It ripens about May 20. We pulled the last plums on June 3. It is enormously productive, setting the great clusters of fruit in the center of the trees, preventing breaking (see photo).

The trees are wonderfully healthy and robust.

Its brilliant red flesh makes jelly exquisite in both color and quality.

For season of 1919-1920 we have only June-bud trees.

PRICE for trees, any size, \$1.00 each, \$10 per 12.

June-bud trees cut back can be easily mailed.

A box of the plums mailed to Cincinnati arrived in perfect condition.

Sweet as sugar.
